MEMORANDUM FOR: Deputy Director, National Photographic Interpretation Center

SUBJECT: Requirement and Guidance for Structuring the Automated Object Data File (ODF)

REFERENCE: Memorandum, Same Subject, from Chairman/WIDBWG, 2 February 1970 (Attached)

1. In response to the request to review the above reference and to submit comments or concurrence, the three Groups and the Staff have submitted the following:

TSSG - Little impact on TSSG operations, no comment at this time.

IEG - ... interpose no objection to the document as written.

PSG - ... the principal user of the file should be the one that maintains the file.

PPBS - ... since the primary contributors and main users of the file will primarily be Department of Defense organizations, we should now recommend that the responsibility for coordinating and maintaining the Object Data File be shifted to the DoD.

2. Facts:

a. All inputs to the ODF will be made during third-phase reporting only; and, therefore, NPIC would contribute little to this file.

b. The principal users of the file will be the scientific and technical analysts within DoD.

SUBJECT: Requirement and Guidance for Structuring the Automated
Object Data File (ODF)

c. The initial (verbal) position of CIA is that the ODF is not necessary.

d. At present the file is maintained in a very limited and initial sense. Its current use is to provide listings of objects. No data on the objects has been input.

e. The file may be useful within NPIC. To what extent cannot be determined at this time, although IEG has orally commented that it would make few, if any, requests of the file.

3. The undersigned realizes that the recommendation of this paper would require a change in the NTP. At first glance, it would appear that COMIREX would have to note the change to USIB, per the NTP itself.

4. Recommendation: In view of the above - if the file is to be maintained and further developed along the lines of the reference - it is recommended that the NPIC position be that the responsibility for coordinating and maintaining the ODF as stated in the NTP be transferred to DoD.

NPIC Member, NIDBNG/COMIREX
